

Tech & Innovation Lab

History of Innovation

Ag for Life

G R O W

G GET READY

Guiding Questions:

List innovations you already know and use in your daily life.

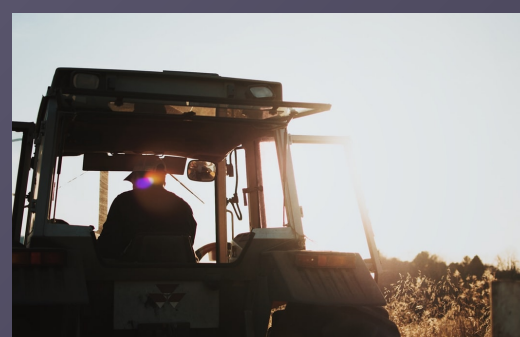

Draw a picture of farming in the “old days” compared to now.

R RESOURCE ROUND UP

Watch the following videos on the revolution of agriculture:

- https://www.youtube.com/watch?v=Yocja_N5s1I
- <https://www.youtube.com/watch?v=3EvlotQAdXI>

O OBSERVE RESULTS OF YOUR LEARNING

Check out the timeline of Canadian Agriculture:

<https://www.fcc-fac.ca/en/knowledge/agrisuccess/timeline-of-canadian-agriculture.html>

As you click through, think about and write down:

- What innovation do you think was most important for farmers?
- What would agriculture look like today without this innovation?
- How do innovations help farmers, consumers and the environment?

Create a photo collage of your top innovations.

Challenge:

Can you arrange the innovations in the collage in chronological order?

W WHAT DID YOU LEARN?

- How has technology changed farming in the last 100 years?
- How are these changes supporting us in producing more food?
- What future innovations do you think farmers could use in food production?

Want to learn more about careers in agriculture? Explore our Careers Lab:
